Export of Radio Valves to Poland

Memorandum by the United Kingdom Delegation

The United Kingdom authorities have been asked to approve the export to Poland of 30 Valves, type ACT.25, valued at £3,360, which are covered by the definition of I.L. Item 1558.

2. These valves are required as spares and replacements in television sound and vision transmitters, not themselves embargoed, which were supplied to Poland in 1956 and which are operated by the Central Management of the Radio and Television Station, Warsaw.

3. The ACT 25 is an ultra high-frequency disc-sealed triode with no unusual features for this type of valve and it is regarded as a normal and necessary requirement for the stated purpose. The usual assurances against re-export would be obtained.

4. Her Majesty's Government consider that the present requirement is reasonable and wish to authorise the export as a servicing case under the provisions of paragraph 13(b) of COCOM Document 3620. They would be grateful for the views of Member Governments by January 28.

United Kingdom Delegation,  
Paris.
